# CAMBUSA

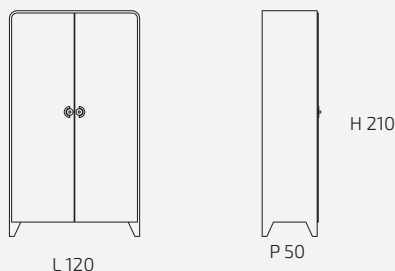

designer Licio Tamborrino, Marco Capeto e Donato Tanzarella

L'acciaio verniciato a polvere e "riscaldato" dall'abbinamento con il legno è il linguaggio scelto da Officine Tamborrino per reinterpretare un armadio icona dell'America degli anni '20. Cambusa coniuga la semplicità delle linee con la solidità dei materiali. La generosità degli spazi consente di conservare gli utensili della cucina, i cibi, la cantina.

Finiture industriali con attenzione ai dettagli artigianali.

*Officine Tamborrino chose powder-painted steel and combination with wood as language to reinterpret a piece of furniture which represented a landmark in kitchen design during the Twenties in USA. A cabinet for storing everything you need for the art of cooking, characterized by simple lines and solidity of materials, plus the right mix between industrial look and focus on artisanal traits.*

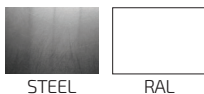

**DIMENSIONI/ SIZE** L 120 cm X P 50 cm X H 210 cm
