

CAOS

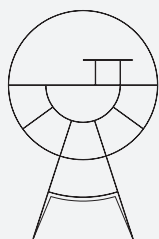

CAOS

designer Alessandro Guerriero

Una scultura di acciaio le cui curve suggeriscono un nuovo modo di concepire lo spazio. Caos si sviluppa attorno alla forma del cerchio con un'alternanza tra linee rette e curve che imprime un eccezionale ritmo. La dicotomia è l'elemento distintivo del mobile libreria progettato e disegnato dal maestro Guerriero. La linea dritta che si addolcisce con la curva, l'obliquo che gioca con il piano, il tessuto che scalda l'acciaio e ancora il contrasto tra colori severi e colori vivaci. Caos affascina per la sua duplice identità di oggetto estetico ed emozionale e può essere dotato di diffusori audio digitale stereo 2x50 Watt con ingresso bluetooth APT-X Altoparlanti fullrange 4". Le finiture in legno dei diffusori sono personalizzabili.

Caos is a steel sculpture with curves that suggest new ways of designing and using spaces. It derives from a circle by alternating straight lines and curving lines to get a final unexpected rhythm. A solid central core is sustained by two thin and minimal supporting elements. Dichotomy becomes the distinctive feature of this bookshelf designed by internationally renowned designer Alessandro Guerriero: the straight line gets softer thanks to a curve, the diagonal trait plays with flat levels, textile warms steel up and moreover a contrast takes place between grave colours and lively colours. Caos expresses a special fascination as it is characterized by a double identity and acts as esthetical and emotional item. Now it can also be provided with a special sound system including bluetooth APT-X loudspeakers fullrange 4"
