

**ECO**

# ECO

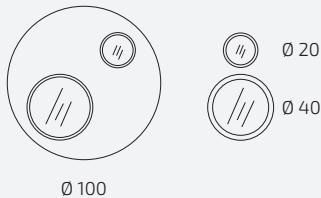

designer Alessandro Guerriero

Guardarsi e vedersi attraverso i due specchi circolari mobili di Eco, rappresenta l'elogio della personalizzazione, potendo scegliere arbitrariamente la posizione dei cerchi specchianti. Due specchi fissati da un sistema di calamita su una base di lamiera di acciaio. Polveri epossidiche rendono le varianti colori accattivanti.

Così come un' eco che riflette il suono appena emesso, lo specchio di O Design Collection riflette la personalità del suo frutto. A seconda del suo umore, delle sue esigenze o semplicemente del suo gusto adatta il suo aspetto. Lo specchio che esprime la personalità e riconsegna la verità di un momento.

*Looking at each other through the two mobile round mirrors of ECO represents the utmost experience of customization, as users can freely choose how to place each mirror. They are fixed to a base made of steel plate by means of magnets. A wide range of epoxy powder paints is then available to get the most intriguing set of colour options. Like an echo reflecting the sound waves as they are produced, this mirror belonging to O Design Collection does reflect its user's personality. Depending on his or her mood, needs or taste, it will modify its own outline. ECO's the mirror that expresses one's personality and gives back the truth of a moment.*
